SALESFORCE | WEBCONSOLE | WAREHOUSING (WMS) | MOBILE MANAGEMENT | MANUFACTURING | WORKSHOP | PROCUREMENT

The Palladium Mobile App is a Suite of mobile features and tools designed to cater for your Mobile Salesforce, End-to-End Warehousing, Workshop Processing, Manufacturing Issues, Management Approvals and Performance Dashboards. The App Suite is arguably the most comprehensive set of mobile tools around, boasting over 30 core Palladium functions, and is available for Android, iOS and Windows devices.

## Mobile Salesforce & WebConsole

The Mobile Sales-Force functionality ensures that your Salespersons can perform optimally at your customers while processing orders or quotes real-time and ensuring that orders get expedited before they are even back at the office. The Web-Console also allows management to track your Salespersons and view performance efficiency in real-time.

### Capture POD's

Allow your Salespersons or Drivers to capture customer POD's and have these uploaded directly to Palladium whether its by "sign to glass" or as a photo of a signed document.

### Expense Management

Allow your Salespersons to capture and upload their expense claims on the go.

### Inventory Enquiries

Have a real-time view of on-hand inventories by item, location and even bin.

### CRM Activities

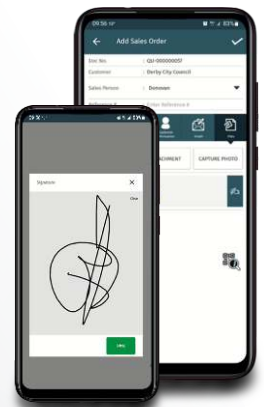

Process CRM activities with live updates directly to your Palladium Calendar.

### Customer Maintenance

Have the ability to Update Customer Information or Create New Customers.

### Sales Quotes & Orders

Generate Sales Quotes, Freehand Quotes and Orders on the go while being connected to live data. Email Quotes or Orders from the device. Allow customers to "sign to glass" with the signature being embedded on the Order in Palladium for future reference.

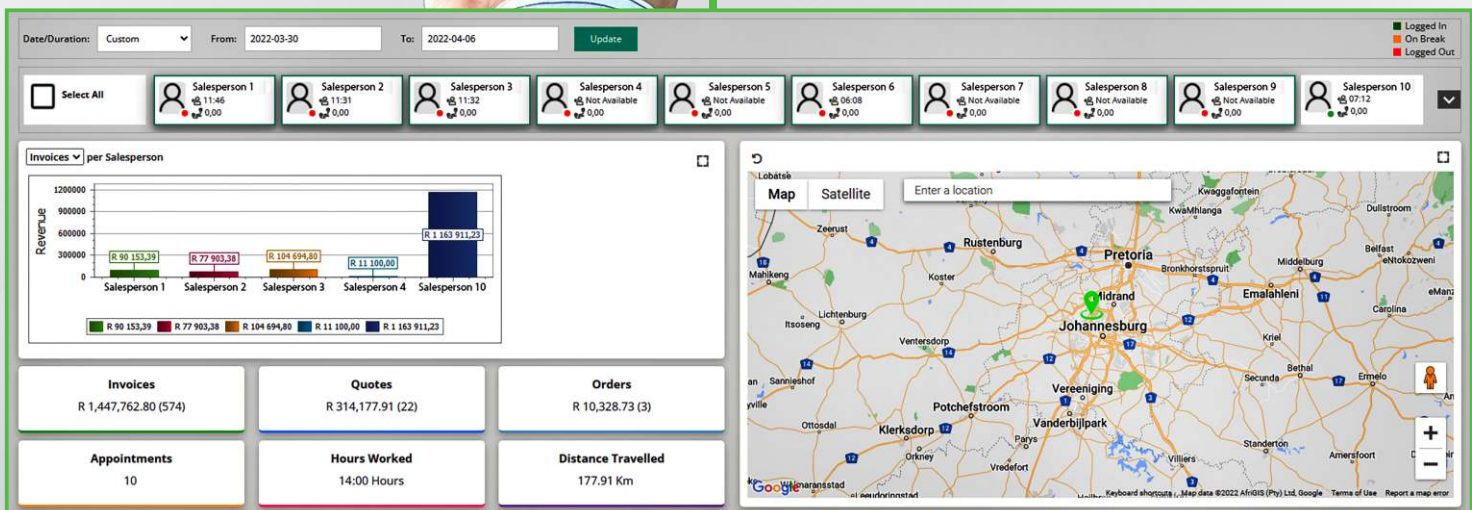

### Sales Team Clock in/Clock out Function

Allowing your sales team to clock in and out on their mobile devices.

### Salesperson Performance & Tracking

Log into the Web-Console and track your Salespersons in real time and monitor their live locations, performance or view their previous trips and also have the ability to pinpoint other customers near your Salespersons.

SALESFORCE | WEBCONSOLE | WAREHOUSING (WMS) | MOBILE MANAGEMENT | MANUFACTURING | WORKSHOP | PROCUREMENT

Our Mobile WMS allows users to manage the full Warehousing function from receiving to fulfilment right through to dispatch from Android powered mobile scanners like Zebra or Honeywell. The WMS accesses your live Palladium databases ensuring that inventory data is always current and accurate, regardless of whether you access it from head office or the warehouse.

## Warehousing (WMS)

The Warehousing Suite gives your staff the flexibility of processing all the Warehousing functionality from a mobile device, alleviating the need to be near a computer, ultimately saving time and improving accuracy.

### GRVs

Receive Inventory into a receiving area from the mobile device with full scanning authentication to eliminate errors.

### Process Put Away's

Process Put-Aways from GRV's into the correct stocking bins after checking.

### Count Stock

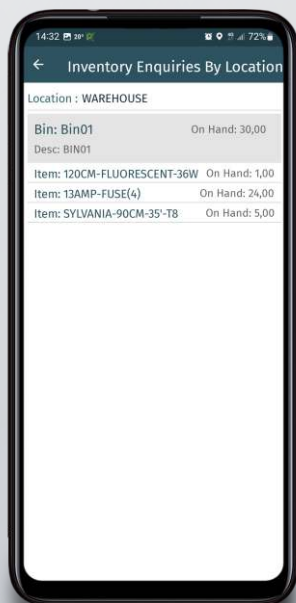

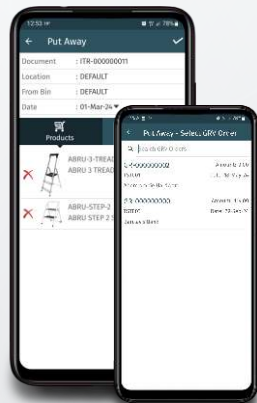

Conduct Stock Takes, either by scanning Inventory or by manually entering quantities.

### Inventory Enquiries

Process Inventory Enquiries at any time by item, location, or bin.

### Warehouse Transfers

Move Inventory from one Warehouse to another in a single process.

### Bin Transfers

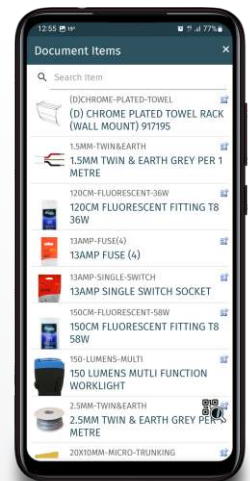

Move Inventory to different bins to optimise your warehouse space.

### Pick Tickets

Process Pick Tickets with the system transferring the items to the Picked location on completion.

### Delivery Advices

Process Delivery Advices from open Sales Orders or picked items to ensure accuracy at your dispatch area.

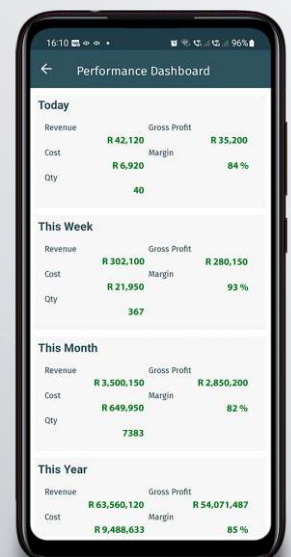

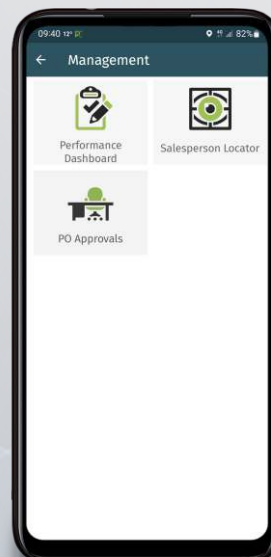

## Mobile Management

### Purchase Order and Requisition Approvals

Approve Purchase Orders and Inventory Requisitions on the go.

### Performance Dashboards

View your company performance for the day, week, month, or year to date either by Item Category, Customer Category or Salesperson.

## Mobile Manufacturing

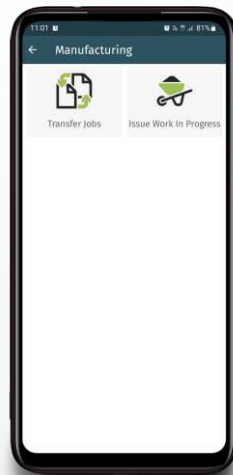

The module caters for Shop Floor functions that will greatly optimise your manufacturing process and save time.

### Issue Work In Progress

Process inventory Issues and Returns from the mobile device and collect directly from the store.

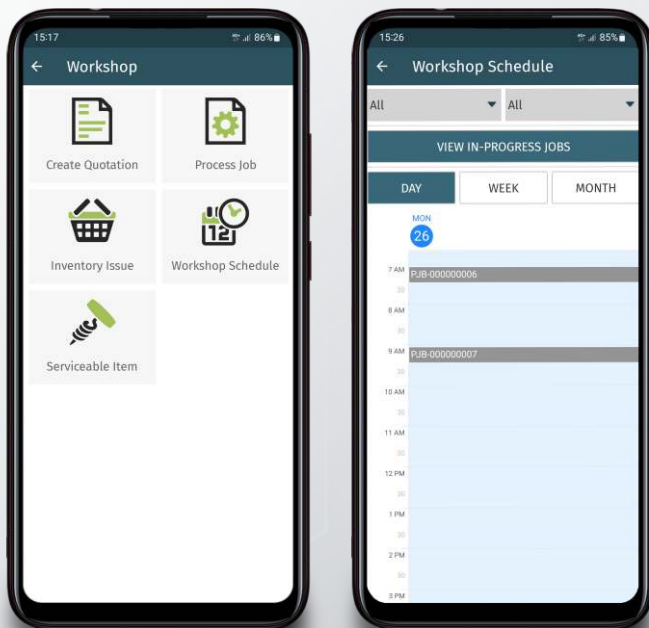

### Transfer Jobs

Transfer Jobs from one Work Centre to another, wherever you are in the factory.

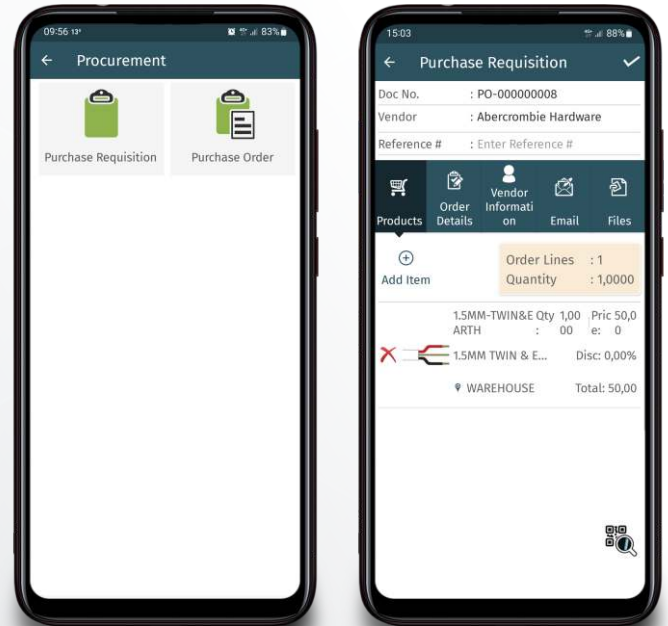

## Mobile Workshop

This Module allows you to process all of the Workshop functions from the device. This includes the Creation of Quotes, the Opening of Jobs, Process Inventory Issues and Returns, and even have the ability to view the Shop Calendar.

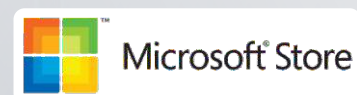

## Mobile Procurement

Process your Purchase Order Requisitions on the move and even have these push to management for remote authorisation.
